

Angels' Share

All great whiskies and rums are made with a little magic; during the maturation process a small portion is lost through evaporation and folklore has it that this is 'the Angels' Share'. For cognac it is 'la Part des Anges'. In return for keeping the whisky gods happy the liquor matures and develops its unique flavour.

The Cloud Pour is a device that produces an ethereal white cloud of whisky above the surface of a glass, vastly increasing the aroma of the drink and returning the Angels' Share to the whisky-lover.
